<b>JWE-620UA-6B</b>	U-1	June 2009
	U-2	—
	U-3	August 2009
	V-0	January 2010
	A-0	January 2011

	B-0	January 2012
	B-1	February 2012

### Auxiliary Code Breakdown

The auxiliary code is the first two characters in the serial number. The first character indicates the year. Years progress or regress in alphabetical order. The series runs from "A" through "V" and the letters "I" and "O" are skipped. The second character indicates significant part changes within a year. Base is "0" and this number advances for each change. In cases where there is a letter in parentheses, this designates the month. This is the last character in the serial number. The series runs from "(A)" through "(M)" and the letter "(I)" is skipped. This designation is only included when identifying a parts change within an auxiliary code.

### Note About Ordering Parts

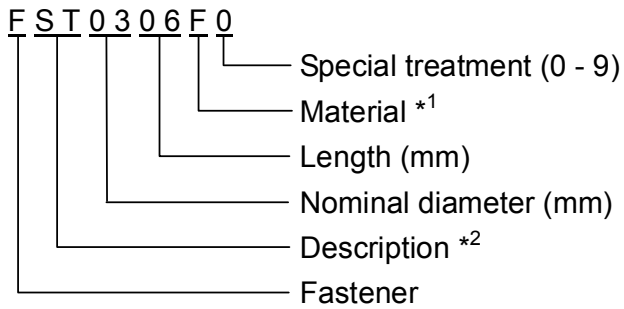

Most assemblies cannot be ordered as complete units; parts in the assemblies generally must be ordered separately.

**MARKS LOCATED UNDER THE AUXILIARY CODE**

- = Part deleted.
- x = Part deleted and replaced by "o" part.
